PROJECTS

Events Management App

Visit App: <https://revents-264421.web.app>

Full-stack React app that allows users with unique profiles to create their own events and also view and join events created by others.

- User authentication using Facebook, Google or email/password.
- Upload photos and customize user profiles.
- Google Maps API to add and display event locations on a map.
- Chatting system on event pages.
- Follow/Unfollow users.
- Strong Firestore security rules.
- **Used technologies:** React JS, Redux, Firebase, Firestore, Redux thunks, Cloud Functions, Semantic UI, React Router, HTML, CSS, JavaScript.

E-Commerce App

Visit App: <https://bd-clothing-live.herokuapp.com/>

It is an online clothing store where users can sign in and browse various categories of items. They can add/remove items to their cart and can checkout using Stripe.

- User authentication using Google or email/password.
- Browse and add/remove items to a cart.
- Accept user payments using the Stripe API.
- **Used technologies:** React JS, Redux, Firebase, Sass, React Router, Reselect, HTML, CSS, JavaScript, Stripe.

Face recognition App

Visit App: <https://github.com/rawanul93/myfacerecognitionapp>

Simple facial recognition web application where users can sign in and upload photos to record how many faces are in that photo.

- User authentication using email and password.
- Upload photos to check how many faces are in the photo.
- Uses a facial recognition API.
- RESTful API to handle the backend using Express.
- Data stored in PostgreSQL database.
- **Used technologies:** React JS, PostgreSQL, Express, HTML, CSS, JavaScript, RESTful API.

WHO AM I?

I am a passionate and creative professional actively seeking a role as a react web developer. I strive to develop technologies that help people and organizations innovate and become more efficient.
